RE: WQ Monitoring associated with Sheet Pile removal at EMJ

Thanks Erika. That sounds fine to me.

Ravi,

Since the coffer dam removal in occurring under your order, I wanted to give you a heads up regarding discussions at today's weekly Jorgensen meeting about whether or not conduct water quality monitoring associated with removal of the three sides of sheet pile that will start tomorrow 8/28. We decided that instead of requiring monitoring, we would instead trigger conventionals/COC monitoring only if a significant plume and/or sheen is observed in association with the sheet pile removal.

Let us know if you have any thoughts/problems with this approach.
